

Reference Risk Card: UNOBSERVED/UNCONTROLLED ENVIRONMENT

Element ID	Risk Element	Concern
Unobserved/Uncontrolled environment	Risks from unobserved/uncontrolled environment (blind spots) cannot be taken into account in operational or strategic management decisions. No protection or awareness measures for risk-control or risk-minimization can be initiated.	<ul style="list-style-type: none"> Full risk-overview is essential for an organization to manage its challenges (and chances) to achieve its objectives, drive improvement, as well as maintain legal and ethical standing in the eyes of shareholders, regulators, wider community and more specifically in public companies and lotteries. All major, essential risks must be managed.
<ul style="list-style-type: none"> All organizations need rules and a defined sense to minimize "blind spots" in their risk-universe. Ensure that any risks (or opportunities) associated with the organization's activities are identified and addressed in a way that supports the objectives. There are available several standards about governance that help its implementation 		
Frameworks/Methodologies/Standards		
ISO 31000 (Risk Management)		
Auditing with COSO, COBIT and ISO Control frameworks		
Key Risk Control (Broad) Actions (KRC-Actions)		
Area	Generic	
	Objective/action	Outcomes
Organizational	<ul style="list-style-type: none"> Establish systematical risk analysis Usually risk analysis is done by individuals – establish assessment circles using "swarm knowledge" from time to time for a broader scan of the environment. 	<ul style="list-style-type: none"> Risk management system defined (strategy/approach and operational)
