What have we learned since 2022?

Reliable data is essential before meaningful reduction targets can be set.

Signing a commitment is different from embedding it operationally.

Much of the complexity now sits beyond direct operations.

Progress increasingly depends on suppliers and common approaches.

2022 was about commitment. 2026 is about progress.

COMMIT → MEASURE → TARGET → ACT → REDUCE → COLLABORATE

The EL Environmental Initiative is entering its next phase:
turning collective commitment into measurable progress.
